

Short message from the author

- First, I would like to personally thank you for downloading "*frequencyCMS*", I hope that you will find it somewhat useful and build your future projects with it. By doing that you will be contributing to the promotion of free and open-source software.

- Since "*frequencyCMS*" is new, the future of it depends on your ideas, suggestions and critique! Feel free to contact me (check the "*contact information*" section) about anything that you find troublesome or if you have any great idea.

- Keep in mind that "frequencyCMS" is in Beta, some of the feature might not work like they should and some might be disabled. This is only temporary so don't worry.

How to install frequencyCMS?

1. Upload the files on your server via FTP.
2. Change the permission of the folder "installation" and all of the files in it to 777.
3. Change the permission of the file "easy_config.php" to 777. It is located in the "system/easysql_framework/classes" folder.
4. Install the frequencyCMS.
5. Change the permission of the file "easy_config.php" to 644.
6. Enjoy the beta testing! :)

Contact information

- There are several way you can get in touch with me. I have recently registered a domain name "*eledgen.com*" for my current and future projects. The web presentation isn't finished but you can contact me through some of the official e-mail addresses.

Office: office@eledgen.com

For Ideas: ideas@eledgen.com

For Bugs: bugs@eledgen.com

- You can send business proposals to business@eledgen.com.

License

- By downloading and/or using "*frequencyCMS*" you agree to be legally bound by the AGPLv3 license provided with the software.

- The license can be found under the name "*License_AGPLv3.pdf*".

- Đorđe Jocić
